I have a meeting all afternoon and all day on Friday. Although, I expect that the Friday meeting will let out in the afternoon(Maybe 2:30??). Next week is just as busy so I'll try to call you whenever that meeting wraps. Alternatively, I have some pockets of time(11:00) this Thursday, but it sounds like Thurs may not work for you.

Ryan-

I slightly modified the language, see underlined. I did check with Token on entering unpermitted CAFOs inspections into ICIS, and I learned that it will involve a significant amount of work on our part. Given the ICIS resource constraints on our part, I suggest that we go with your language below. I believe we can meet the WP objectives via non-ICIS approach.

Can I tell IEPA contact person that we have agreed upon the following language?

Indicia of Progress: Illinois EPA creates and maintains ~~in~~ **ICIS** a consolidated inventory of Large CAFOs and other permitted CAFOs. The inventory is easily accessible to all Illinois EPA staff and the public. Illinois EPA conducts NPDES evaluations at 25 potential Large CAFOs by June 1, 2013, consistent with approved SOPs. Illinois EPA will report all CAFO inspections it conducted to U.S. EPA annually by July 31. Illinois EPA implements approved annual inspection plans for permitted CAFOs consistent with the National Compliance Monitoring Strategy. Illinois EPA implements a satisfactory training program for inspectors. Illinois EPA responds to all citizen complaints and emergency CAFO-related discharges in a timely manner. Illinois EPA identifies and records 100 percent of Single Event Violations and all wet weather SNC in ICIS.

Sanjay,
we talked yesterday about removing the citation to ICIS in the CAFO workplan. Utilizing ICIS was initially envisioned to accomplish several things: a management information system to maintain the inventory, reporting and tracking inspections, and making the information available to EPA and the public. Citing resources and priorities, you've indicated that you intend to meet these objectives with your own approach and have requested that the ICIS requirement be dropped from the Workplan. While we highly encourage the use of ICIS and wish to continue discussions with you about how it can be utilized, if you can confirm that the objectives listed above can be met, we will agree to remove it from the Workplan. Per our last discussion, I also understand that you are looking into whether reporting of these inspections can be done through ICIS.

I reviewed the workplan to see if it reflects the 3 items above and added in language for reporting of inspections(done manually or through ICIS, depending what you find out). See redraft below:

Indicia of Progress: Illinois EPA creates and maintains ~~in ICIS~~ a consolidated inventory of Large CAFOs and other permitted CAFOs. The inventory is easily accessible to all Illinois EPA staff and the public. Illinois EPA conducts NPDES evaluations at 25 potential Large CAFOs by June 1, 2013, consistent with approved SOPs. [Illinois EPA will report all inspections it conducted to U.S. EPA annually by July 31.](#) Illinois EPA implements approved annual inspection plans for permitted CAFOs consistent with the National Compliance Monitoring Strategy. Illinois EPA implements a satisfactory training program for inspectors. Illinois EPA responds to all citizen complaints and emergency CAFO-related discharges in a timely manner. Illinois EPA identifies and records 100 percent of Single Event Violations and all wet weather SNC in ICIS.

Please reply back to let me know if this looks okay. Thanks

I think that we are in agreement of what can be done and I'm not asking for more than what we discussed.
(in my mind nothing has changed from what we discussed - its a matter of how to word/ reflect it clearly)

If you read the language, it simply says what was agreed to a year ago, "provide an inventory" . . . "as a basis for the workload assessment". We recognize that it will not be perfect and will continue to be updated. The paragraph goes on to explain the "how" . . . by including all confirmed Large and permitted CAFO sites. This seems perfectly consistent with what we discussed. Per our conversation, the word "final" was taken out from the previous version. I want to avoid "confirmed Large CAFOs" be misinterpreted as relaxing what we previously agreed to or only being a limited inventory.

▼ "Sofat, Sanjay" ---11/19/2012 05:24:09 PM---If we take out the word "confirmed" out of the language, then we go back to the original issue- how

If we take out the word “confirmed” out of the language, then we go back to the original issue- how do you come up with the large CAFO inventory by February 28, 2013. You will still have several hundred unconfirmed AFOs/CAFOs in the database. It is impossible to achieve this task, unless you have a different definition of the large CAFO inventory.

I am going to let Marcia know about this.

Subject: RE: Draft CAFO Workplan.

Sanjay,
I made one change in the first sentence and am submitting this to the workplan folks. Thank you for the discussions on this. I am actively working on the inventory. I got a draft final last week that needed some work and is back on my desk.

I think that its OK to explain/reflect your approach to establish the inventory is to confirm facilities but I think that its also important to maintain the integrity that it is THE inventory with no qualifiers.

b. By February 28, 2013, Illinois EPA will provide an inventory to U.S. EPA that lists Large CAFOs and any other permitted CAFOs as a basis for the final Workload Assessment. Illinois EPA will maintain and regularly update its CAFO inventory through a process of confirming sizes of additional livestock facilities. Illinois EPA will make the inventory publically accessible and send updates to EPA at least twice a year. By September 30, 2013, Illinois EPA will provide an update to its CAFO inventory that confirms whether additional livestock facilities are Large CAFOs. Illinois EPA will have a process in place to get regular updates about potential Large CAFOs from Illinois Department of Agriculture and Illinois Department of Public Health. The inventory will include all confirmed Large and permitted CAFO sites identified by Illinois EPA regional offices, permit applications, citizen tips and complaints, U.S. EPA, the Illinois Department of Agriculture, the Illinois Department of Public Health, and the Illinois Emergency Management Agency. The inventory may make use of a Geographic Information System-based

pilot inventory currently being developed for seven high profile counties.

Subject: RE: Draft CAFO Workplan.

Ryan-

Here are some changes to the language. I thought about your suggestion re 2nd sentence, but didn't expand on it. The reason is- most like IEPA will use more than one way to confirm large CAFOs, and coming up with that list of ways IEPA will confirm large CAFOs would be hard to do at this time.

b. By February 28, 2013, Illinois EPA will provide an inventory to U.S. EPA that lists all confirmed Large CAFOs and any other permitted CAFOs as a basis for the final Workload Assessment. Illinois EPA will maintain and regularly update its CAFO inventory through a process of confirming sizes of additional livestock facilities. Illinois EPA will make the inventory publically accessible and send updates to EPA at least twice a year. ~~in September and February.~~ By September 30, 2013, Illinois EPA will provide an update to its CAFO inventory that confirms whether additional livestock facilities ~~AFOs~~ are Large CAFOs. Illinois EPA will have a process in place to get regular updates about potential Large CAFOs from Illinois Department of Agriculture and Illinois Department of Public Health. The inventory will include all confirmed Large and permitted CAFO sites identified by Illinois EPA regional offices, permit applications, citizen tips and complaints, U.S. EPA, the Illinois Department of Agriculture, the Illinois Department of Public Health, and the Illinois Emergency Management Agency. The inventory may make use of a Geographic Information System-based pilot inventory currently being developed for seven high profile counties.

Please let me know if you are okay with the changes. Thanks for all your help.
